WEEK 11

Sort a given set of N integer elements using Heap Sort technique

CODE:

```
#include <stdio.h>
void heapify(int arr[], int n, int i)
{
  int largest = i, left = 2 * i + 1, right = 2 * i + 2;
  if (left < n && arr[left] > arr[largest])
     largest = left;
  if (right < n && arr[right] > arr[largest])
     largest = right;
  if (largest != i)
   {
     int temp = arr[i];
     arr[i] = arr[largest];
     arr[largest] = temp;
     heapify(arr, n, largest);
   }
}
void heapsort(int arr[], int n)
{
```

```
for (int i = n / 2 - 1; i >= 0; i--)
     heapify(arr, n, i);
  for (int i = n - 1; i >= 0; i--) {
     int temp = arr[0];
     arr[0] = arr[i];
     arr[i] = temp;
     heapify(arr, i, 0);
   }
}
int main()
{
  int arr[10], n, i;
  printf("Enter number of elements \n");
  scanf("%d", &n);
  printf("Enter %d elements \n", n);
  for (i = 0; i < n; i++)
     scanf("%d", &arr[i]);
  heapsort(arr, n);
  printf("\nSorted array: ");
  for (i = 0; i < n; i++)
     printf("%d", arr[i]);
  return 0;
}
```

OUTPUT:

```
Enter number of elements
| Signter 5 elements
| 42 12 10 50 23
| Sorted array: 10 12 23 42 50
| Process returned 0 (0x0) execution time : 14.379 5
| Press any key to continue.
```
